## SUMMARY

Final-year **B.E. Computer Engineering** student at **SPPU** (2027) with hands-on **DevOps** internship experience automating infrastructure, **CI/CD** pipelines, monitoring, and incident response in production. Proficient in **Kubernetes**, **Docker**, **Terraform**, **Ansible**, **GitHub Actions**, **Helm**, and **AWS/GCP/Azure**. Built end-to-end **DevOps**, **SRE**, and **DevSecOps** projects with strong focus on reliability, observability, automation, and secure delivery. Seeking **DevOps**, **SRE**, and **DevSecOps** internships, apprenticeships, and fresher roles.

## EXPERIENCE

### Hisan Labs Pvt. Ltd.

Feb 2026 – Present

*DevOps Intern*

*Pune, India*

- Automated configuration management across staging and production using **Ansible** playbooks, ensuring environment consistency and cutting manual setup time by **~50%**.
- Reduced MTTR by **~35%** across 3 services by configuring **ELK Stack** alerting and **Prometheus** rules, cutting average incident resolution from 40 min to 26 min.
- Designed **GitHub Actions CI/CD** workflows for pre-production acceptance testing, enforcing automated quality gates and reducing failed deployments by **~30%**.

### Widesoftech Pvt. Ltd.

Jan 2026 – Feb 2026

*Full Stack Web Development Intern*

*Pune, India*

- Built and deployed **InternMeets**, a live student internship platform, handling real-world deployment, debugging, and incident resolution within a cross-functional team in under 4 weeks.

## PROJECTS

### GitOps-Driven Kubernetes Platform on AWS EKS | *AWS, EKS, Docker, Kubernetes, Terraform, ArgoCD*

- [github.com/divyal27/GitOps-driven-Kubernetes-Platform-on-AWS-EKS](https://github.com/divyal27/GitOps-driven-Kubernetes-Platform-on-AWS-EKS)
- Built a production-grade **GitOps** platform on **AWS EKS** using **Terraform**, **Docker**, and **Kubernetes** to automate deployments, rollback workflows, and environment management with **ArgoCD**.

### SIOps SRE Platform | *Python, Kubernetes, Terraform, GitHub Actions, Prometheus, Grafana*

- [github.com/divyal27/slops-sre-platform](https://github.com/divyal27/slops-sre-platform)
- Built a self-service **SRE platform** that provisions environments, automates delivery workflows, and provides **Prometheus/Grafana** dashboards and alerting for operational visibility.

### Shift-Left Security Pipeline | *GitHub Actions, DevSecOps, Trivy, SonarQube, SAST, container scanning*

- [github.com/divyal27/shift-left-security-pipeline](https://github.com/divyal27/shift-left-security-pipeline)
- Implemented a **DevSecOps** pipeline that applies **shift-left security** in **CI/CD** through source scanning, dependency checks, container scanning, secrets detection, and policy enforcement before deployment.

## EDUCATION

### Genba Sopanrao Moze College of Engineering, SPPU

2023 – 2027

*B.E. Computer Engineering*

*Pune, India*

## CERTIFICATIONS

[Advanced Testing Practices Using AWS DevOps Tools](#), [Claude Code in Action](#), [Building with the Claude API](#)

## SKILLS

**Cloud & Infrastructure:** AWS, GCP, Azure, Linux  
**Containers & Orchestration:** Docker, Kubernetes, Helm  
**CI/CD & GitOps:** GitHub Actions, Jenkins, GitLab CI, ArgoCD  
**IaC & Configuration:** Terraform, Ansible  
**Monitoring & Observability:** Prometheus, Grafana, ELK Stack, Datadog, Dynatrace, AWS CloudWatch  
**DevSecOps:** Trivy, SonarQube, Bandit, SAST  
**AIOps:** Moogsoft, Splunk ITSI, LogicMonitor, Dynatrace  
**Languages:** Python, Bash, YAML, Java  
**OS & Version Control:** Linux, Git, GitHub, GitLab
